

# HPC in High School: Teaching and Mentoring (and funding it) And From the Student's Perspective

Brad Burkman, LSMSA Math Lecturer, and students Katherine  
Prutz and Annalise Labatut

Louisiana School for Math, Science, and the Arts

2 October 2013

*NAK-ə-təsh*

# Big Ideas

1. Big Users from Little Users Grow
2. To solve a compelling problem,  
students will develop the necessary skills
3. Computing is ~~NOT~~ important in every discipline
4. Student interest follows faculty passion

# Big Users from Little Users Grow

The screenshot shows a web browser window titled "Sage Cell Server - Mozilla Firefox". The address bar shows "aleph.sagemath.org". The page content includes a link "About Sage Cell Server", a large heading "Sage Cell Server", and a prompt "Type some Sage code below and press Evaluate." Below the prompt is a text area containing Sage code. At the bottom left is a blue "Evaluate" button. At the bottom right, there is a "Language:" dropdown menu set to "Sage" and a checked checkbox for "Syntax Highlighting".

Sage Cell Server

[About Sage Cell Server](#)

# Sage Cell Server

Type some Sage code below and press Evaluate.

```
1 var ( "a, b, c" )
2 f(x) = x^2 - 2
3 a = 1
4 b = 2
5 d = 1.0
6 while ( f(b) - f(a) > 1/100 ):
7     c = (a + b) / 2
8     if ( f(c) * f(a) > 0 ):
9         a = c
10    else:
11        b = c
12    print a, b, c
```

Language: Sage

1. The Coder
2. The User

# Digital Humanities

A Council on Library and Information Resources (CLIR) study of projects funded under the “Digging Into Data Challenge” found that the issues and opportunities presented by “big data” in the humanities and social sciences require basic changes in academic methods and scholarly practices.

“How was Lincoln influenced by his Southern upbringing?”

“How can I develop a new text-mining algorithm to examine Lincoln’s writings to look for Southern influences?”

# NPR Sunday Puzzle

Think of a word starting with G.

Change the G to a T and rearrange the letters after the T.

The result will be a new word

with the same meaning as the original word.

## NPR Sunday Puzzle

Think of a word starting with G.

Change the G to a T and rearrange the letters after the T.

The result will be a new word  
with the same meaning as the original word.

giant      titan

Think of a word starting with G.

Change the G to a T and rearrange the letters after the T.

The result will be a new word  
with the same meaning as the original word.

giant      titan

garishly      trashily

Given a genome sequence starting with guanine,  
change the first base to thymine  
and permute some of the other bases.

The result will be a known sequence  
with the same genetic function.

## Summer 2013

Two teachers in LA-SiGMA RET

(Research Experiences for Teachers)

One student supported by LA-SiGMA

Load Balancing with MIC on Stampede

Three students in computational labs at LSU and Southern

Worked to incorporate HPC into their advisors' work

Three students to XSEDE'13 in San Diego

Two gave a poster

# Funding

- ▶ Louisiana School Foundation
- ▶ Research Assistantships for High-School Students (RAHSS)
- ▶ REU for Recent Alumni
- ▶ Outreach sections of Domain-Science Grants
- ▶ NSF/IEEE TCPP Undergraduate Curriculum Early Adopter Award
- ▶ EPSCoR Proposal under Review

Annalise and Kat:  
HPC from the Perspective of a High  
School Student

# Objective for this Project

To create an ultracovert mechanism to take a picture of an intruder

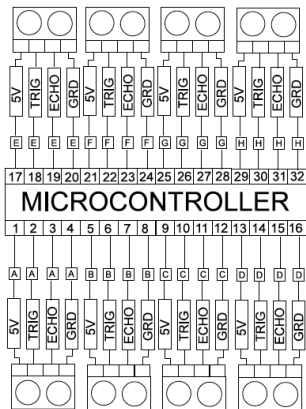

Added benefits of:

- ▶ Collecting our own data
- ▶ Experimenting with OpenMP

# Safe With Sound Alarm System - Engineering Component

## Circuitry Wiring/Processing Language

# Safe With Sound Alarm System - Calculating Gradient

Rule: For each height, the gradient decreases (becomes darker) as  $x$  decreases and  $y$  increases, and while the rate of change in  $x$  decreases and rate of change in  $y$  increases.

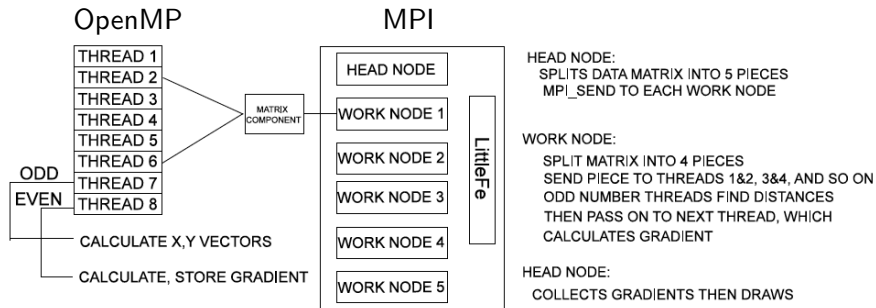

$$x_n = d \cos \theta \quad (1)$$

$$y_n = d \sin \theta \quad (2)$$

$$g = 255 - \frac{255(\sum \Delta x - \sum \Delta y)}{n} \quad (3)$$

# Safe With Sound Alarm System - HPC

# Future Work

To reduce noise:

- ▶ Create our own sensors
- ▶ Vibration Isolation

# Future Work

To reduce noise:

- ▶ Create our own sensors
- ▶ Vibration Isolation

Patent?

# Future Work

To reduce noise:

- ▶ Create our own sensors
- ▶ Vibration Isolation

Patent?

Create a mesh from the 3D data to create a face that can be digitally manipulated with 3D software

# How did we do it?

# This Past Summer - Gaining Skills and Pursuing Interest

## Katherine

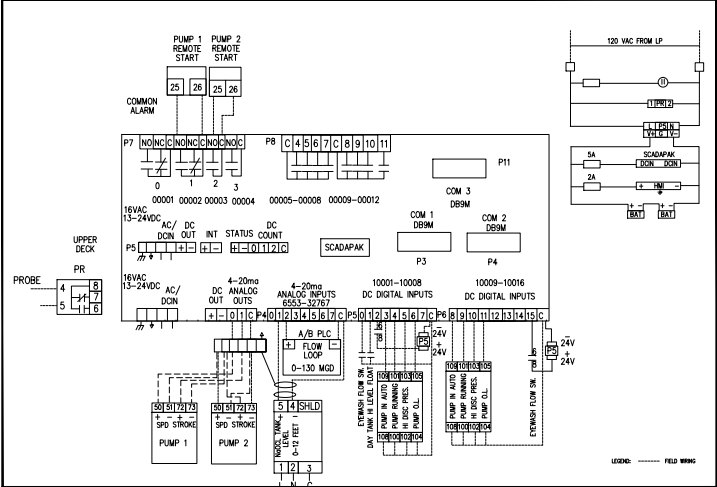

- ▶ Parallelizing the Digital Reassembly of 3D Skull Fragments
- ▶ Learning MPI
  - ▶ Shodor Workshop

## Annalise

- ▶ High Temperature Desulfurization of Biogasifier Effluents
- ▶ Learning G Programming

# Learning Engineering - Wastewater Treatment Plant
